JLLIS Transition

Mr. Christopher Sonntag,
Director,
Marine Corps Center for Lessons Learned.

Background

- JLLIS co-management responsibilities defined by MOA JS J7, MCCLL, and JCOA signed in April 2007.
- MCCLL responsible for:
  - incubation hosting
  - software development/systems engineering
- MOA “escape clause” 90 day termination notice
  - MCCLL provided JS J7 a 90 day termination letter in early April 2009, effectively terminating the MOA in July 2009.
  - Migration Plan to JS J7 - FOC 1 Oct 2010

Reasons for Migration

- MCCLL/USMC resources
- MCCLL refocusing strategic vision to core competencies and support for Marine Corps Operating Forces
- “Incubation hosting” – two years and counting.
- Without MOA termination, migration would continually be OBE.
- Marine Corps will continue to support JLLIS by providing conduit to exchange data.

JLLIS Transition

- MCCLL and the JS J7 working towards JLLIS transition by:
  - Sep 2009:
    - JLLIS software updates are executed by the J7 under the configuration management of MCCLL.
  - Apr 2010:
    - JLLIS and Marine Corps LMS are unbundled, operate independently and remain interoperable.
  - Sep 2010:
    - JLLIS FOC at J7 JS or ???.
